Clark Totalift, handles more than 120,000 particular components built for 20 unique brands of lift trucks and automated equipment. Your regional Clark Supplier is your total source for availability of all your components needs supplied by Clark Totalift.

Clark's phenomenal Parts Distribution Facilities are conveniently located in Louisville, Kentucky, which serves both their customers and dealers in North America, and Changwon, South Korea, which handles their Asian sellers and customers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing producers. Driven to provide the highest level of value and service to our customers, Clark remains on the cutting edge when it comes to enhancing efficiency and benefiting performance.

Internationally, Clark has one of the most outstanding dealer support networks. With over 550 locations worldwide, seller representation in over 80 nations and 230 locations in North America, their high level of commitment to their customers predominates the materials handling market.

Clark proudly remains an progressive leader of the material handling industry, revolutionizing safety features such as the worker restraint system. This exceptional commitment to safety is at this time a customary feature on every forklift.

Clark's relentless effort to possess the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first forklift producer across the globe to be certified with the internationally approved quality standard ISO 9001 for every one of their manufacturing plants. Furthermore, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be ready for any environmental limitations, thus placing them in a prevailing industry position.

Clark has chosen the system of "Lean Production" at all of its assembly facilities for the reason that this technique is extremely economical and permits minimal use of resources. Established to guarantee maximum efficiency, this system is intended to find and acknowledge the most efficient ways for manufacturing facility management. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

By working collectively, Clark's product suppliers and engineers communicate towards enhancing product efficiency while minimizing costs. The new value engineering agenda combines progressive product growth and provides superior consumer support and service within the industry.
