

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country trip in their RV. Freshly retired, after spending several years working with his brother to manufacture their crane company into an market leader, John had no idea that important trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road expedition.

Whilst on their trip, John spent time conversing with previous business contacts whom the Groves stopped to visit along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John uncovered an infinite marketplace for a product that could promptly and safely lift individuals in the air to accomplish upkeep and other building services.

Upon returning from their travels, John established a joint venture with two friends and obtained a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty personnel, they built and sold the first JLG aerial work platform. The business incorporates many of the basic design essentials of that original lift into existing versions.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the marketplace. As of today, the business has expanded itself into several international marketplaces and continues to cultivate new equipment to ensure that customers are able to become safer and more resourceful within their workplace.
